

Replit Fix Brief: Character Limit & Alert Dialog Removal

Replit, we have a critical UX issue when users generate highly detailed prompts. Currently, if a prompt exceeds 2,000 characters, clicking "Run With AI Here" throws a raw browser `alert()` dialog. This is a terrible user experience and defeats the purpose of building comprehensive prompts.

We need to fix this in two parts: raise the limit, and replace the `alert()` with a graceful inline warning.

1. Raise the Character Limit

In the JavaScript file that handles the "Run With AI Here" button click (likely `pmg-chassis-v3.js` or `pmg-suite-handoff.js`), locate the character limit check.

Change:

JavaScript

```
// OLD
if (promptText.length > 2000) { ... }

// NEW
if (promptText.length > 6000) { ... }
```

Note: 6,000 characters is well within the context window of modern LLMs like ChatGPT, Claude, and Gemini.

2. Replace the `alert()` with an Inline Warning

Remove the `alert("Your prompt is too long to run...")` call entirely.

Instead, when the prompt exceeds 6,000 characters, we want to show a friendly inline message right above the "Run With AI Here" button, guiding them to use the direct "Send to" buttons instead.

HTML Structure (Inject this dynamically or place it hidden in the HTML above the Run button):

HTML

```
<div id="pmgv3-length-warning" class="pmgv3-inline-warning" style="display: none">
  <span class="warning-icon">⚠</span>
```

```
<div class="warning-text">
  <strong>Epic prompt!</strong> It's too detailed for the quick preview window
</div>
</div>
```

JavaScript Logic Update:

JavaScript

```
const runBtn = document.getElementById('btn-run-ai'); // Adjust ID as needed
const lengthWarning = document.getElementById('pmgv3-length-warning');

runBtn.addEventListener('click', () => {
  const promptText = document.querySelector('.pmgv3-prompt-output').value; // AI prompt text

  if (promptText.length > 6000) {
    // Show the inline warning instead of an alert
    lengthWarning.style.display = 'flex';

    // Optionally, disable the Run button or change its text
    runBtn.disabled = true;
    runBtn.innerText = "Prompt too large for preview";
    runBtn.style.opacity = "0.5";

    // Highlight the "Send to" buttons to guide the user
    const sendButtons = document.querySelector('.pmgv3-send-buttons-container');
    if (sendButtons) {
      sendButtons.classList.add('highlight-pulse');
      setTimeout(() => sendButtons.classList.remove('highlight-pulse'), 1500);
    }
    return;
  }

  // ... proceed with normal Run With AI logic ...
});
```

3. CSS Styling for the Warning

Add these styles to `pmg-chassis-v3.css` :

CSS

```
.pmgv3-inline-warning {
  display: flex;
  align-items: flex-start;
  gap: 12px;
```

```

background: rgba(255, 184, 0, 0.1);
border: 1px solid rgba(255, 184, 0, 0.3);
border-radius: 8px;
padding: 12px 16px;
margin-bottom: 16px;
animation: slideDown 0.3s ease-out;
}

.pmgv3-inline-warning .warning-icon {
  font-size: 18px;
  line-height: 1;
}

.pmgv3-inline-warning .warning-text {
  color: rgba(255, 255, 255, 0.9);
  font-size: 13px;
  line-height: 1.4;
}

.pmgv3-inline-warning .warning-text strong {
  color: #ffb800;
}

@keyframes slideDown {
  from { opacity: 0; transform: translateY(-10px); }
  to { opacity: 1; transform: translateY(0); }
}

/* Pulse animation to draw attention to the Send buttons */
@keyframes pulseHighlight {
  0% { box-shadow: 0 0 0 0 rgba(0, 200, 150, 0.4); }
  70% { box-shadow: 0 0 0 10px rgba(0, 200, 150, 0); }
  100% { box-shadow: 0 0 0 0 rgba(0, 200, 150, 0); }
}

.highlight-pulse {
  animation: pulseHighlight 1.5s ease-out;
  border-radius: 8px;
}

```
