

Replit Fix Brief: Prompt Whisperer — Redesign as Slim Glowing Search Bar (V2)

Replit, the original Prompt Whisperer brief created a large panel that looks identical to the main prompt builder. This is confusing to users. We need to completely redesign the Whisperer so it looks like a **slim, glowing search bar** — a conversation starter, not a workspace. It should take up minimal vertical space and feel completely different from the main builder below it.

The New Layout (Top to Bottom)

Plain Text

```
[ ✨ Prompt Whisperer – slim glowing search bar + Spark button ]  
[ – or build from scratch below – ]  
[ Main Prompt Builder – the existing dark workspace box ]
```

1. New HTML Structure

Replace the existing Prompt Whisperer HTML entirely with this slim version:

HTML

```
<!-- Prompt Whisperer: Slim Search Bar -->  
<div class="pmgv3-whisperer-bar" id="pmgv3-whisperer-bar">  
  <div class="whisperer-label">  
    <span class="whisperer-icon">✨</span>  
    <span class="whisperer-title">Prompt Whisperer</span>  
  </div>  
  <div class="whisperer-input-row">  
    <input  
      type="text"  
      class="whisperer-input"  
      id="whisperer-input"  
      placeholder="What's a business idea you've never had time to explore?"  
      autocomplete="off"  
    />  
    <button class="whisperer-spark-btn" id="btn-whisperer-spark">Spark </button>  
  </div>  
</div>  
  
<!-- Divider between Whisperer and Main Builder -->
```

```
<div class="pmgv3-whisperer-divider">
  <span>— or build from scratch below —</span>
</div>
```

2. CSS Styling

Add these styles to `pmg-chassis-v3.css`. The key design goals are: slim height, animated glowing border, and a completely different visual language from the main builder.

CSS

```
/* Whisperer Bar Container */
.pmgv3-whisperer-bar {
  margin-bottom: 12px;
  padding: 14px 18px;
  background: linear-gradient(135deg, rgba(0, 200, 150, 0.06) 0%, rgba(0, 0, 0, 0.06) 100%);
  border: 1px solid rgba(0, 200, 150, 0.5);
  border-radius: 14px;
  box-shadow: 0 0 18px rgba(0, 200, 150, 0.12);
  animation: whisperPulse 3s ease-in-out infinite;
}

/* Subtle breathing glow animation */
@keyframes whisperPulse {
  0%, 100% { box-shadow: 0 0 12px rgba(0, 200, 150, 0.1); }
  50% { box-shadow: 0 0 24px rgba(0, 200, 150, 0.25); }
}

/* Label row */
.whisperer-label {
  display: flex;
  align-items: center;
  gap: 6px;
  margin-bottom: 10px;
}

.whisperer-icon {
  font-size: 14px;
}

.whisperer-title {
  color: #00c896;
  font-size: 11px;
  font-weight: 700;
  text-transform: uppercase;
  letter-spacing: 1.2px;
}
```

```
}

/* Input row: single line with button inline */
.whisperer-input-row {
  display: flex;
  gap: 10px;
  align-items: center;
}

.whisperer-input {
  flex: 1;
  background: transparent;
  border: none;
  border-bottom: 1px solid rgba(0, 200, 150, 0.3);
  color: #fff;
  font-size: 15px;
  padding: 6px 4px;
  outline: none;
  font-family: inherit;
  transition: border-color 0.2s;
}

.whisperer-input:focus {
  border-bottom-color: #00c896;
}

.whisperer-input::placeholder {
  color: rgba(255, 255, 255, 0.45);
  font-style: italic;
}

/* Spark button – compact and bright */
.whisperer-spark-btn {
  background: #00c896;
  color: #000;
  border: none;
  padding: 8px 18px;
  border-radius: 20px;
  font-weight: 700;
  font-size: 13px;
  cursor: pointer;
  white-space: nowrap;
  transition: background 0.2s, transform 0.1s;
}

.whisperer-spark-btn:hover {
  background: #00e6ac;
  transform: scale(1.03);
}
```

```

}

.whisperer-spark-btn:active {
  transform: scale(0.98);
}

/* Divider */
.pmgv3-whisperer-divider {
  text-align: center;
  margin: 16px 0;
  position: relative;
}

.pmgv3-whisperer-divider::before {
  content: '';
  position: absolute;
  top: 50%;
  left: 0;
  right: 0;
  height: 1px;
  background: rgba(255, 255, 255, 0.08);
}

.pmgv3-whisperer-divider span {
  position: relative;
  background: #0d1f1a; /* Match the page background color */
  padding: 0 12px;
  color: rgba(255, 255, 255, 0.35);
  font-size: 12px;
  letter-spacing: 0.5px;
}

```

3. JavaScript Logic

Update the Whisperer logic to work with the new slim input field. The rotating questions should now update the **placeholder text** of the input, not a heading element.

JavaScript

```

const sparkQuestions = [
  "What's a problem you've been putting off solving?",
  "If you had a world-class expert on call right now, what would you ask them?",
  "What's something you wish you could explain better to someone?",
  "What's a business idea you've never had time to explore?",
  "What would you create if you knew it couldn't fail?",
  "What do you need written that you've been dreading?",

```

```

    "What's a complex topic you want to understand in 5 minutes?",
    "What's a skill you want to learn but don't know where to start?",
    "What's a message you've been struggling to write?",
    "What would you build if you had a team of experts helping you?"
  ];

function initWhisperer() {
  const whispererBar = document.getElementById('pmgv3-whisperer-bar');
  const whispererInput = document.getElementById('whisperer-input');
  const sparkBtn = document.getElementById('btn-whisperer-spark');

  if (!whispererBar || !whispererInput) return;

  // Set a random placeholder question
  const randomQ = sparkQuestions[Math.floor(Math.random() * sparkQuestions.length)];
  whispererInput.placeholder = randomQ;

  // Handle Spark button click
  sparkBtn.addEventListener('click', () => {
    const answer = whispererInput.value.trim();
    if (!answer) {
      // If empty, just focus the input to prompt the user to type
      whispererInput.focus();
      whispererInput.style.borderBottomColor = '#ff4444';
      setTimeout(() => { whispererInput.style.borderBottomColor = 'rgba(0, 200, 200, 0.5)'; }, 100);
    }
    return;
  });

  // Transfer the answer to the main goal box
  const mainGoalInput = document.querySelector('.pmgv3-goal-input');
  if (mainGoalInput) {
    mainGoalInput.value = answer;
  }

  // Trigger the Analyze My Idea flow automatically
  const analyzeBtn = document.querySelector('.pmgv3-analyze-btn');
  if (analyzeBtn) {
    analyzeBtn.click();
  }
});

// Allow pressing Enter in the whisperer input to trigger Spark
whispererInput.addEventListener('keydown', (e) => {
  if (e.key === 'Enter') {
    e.preventDefault();
    sparkBtn.click();
  }
});

```

```
}  
  
document.addEventListener('DOMContentLoaded', initWhisperer);
```

4. Reset Behavior

When "Start Over" is triggered (see the Start Over Reset brief), ensure the Whisperer is also reset:

- Clear `whispererInput.value`
- Rotate to a new random placeholder question

Summary of Visual Difference

Feature	Prompt Whisperer	Main Prompt Builder
Height	~80px total	Full textarea (existing)
Shape	Single-line input + inline button	Multi-line textarea
Border	Animated glowing green border	Standard subtle border
Feel	Conversation starter / search bar	Professional workspace
Label	"✨ PROMPT WHISPERER" in teal	"YOUR IDEA" (existing)
Separator	"— or build from scratch below —" divider	N/A
