

PMG Master Spec (v4) — Tuning Upgrades & Copy

Project: PromptMeGood (PMG)

Target: July 1, 2026 Launch

Execution Order: UI Copy → Tuning Upgrades (incl. `ai.ts`) → SEO Metadata

⚠ Pre-Execution Audit Checklist

Before writing any code, Replit MUST verify the following. **Do not break existing functionality.**

- ☐ Confirm `pmg-quick-modes.js` exists and controls the Quick Modes chip row.
- ☐ Confirm `pmg-chassis-v3.css` hides `#advanced-options` with `display: none !important`.
- ☐ Confirm `ai.ts` has `moneyMode`, `humanTone`, `clarityBoost`, and `expertMode` in `StructuredPayload`.
- ☐ Confirm `ai.ts` has `buildUserMessageFromPayload()` handling the existing modes.
- ☐ Confirm `app.html` has the `.btn-analyze` button and the `#tour-banner`.
- ☐ Confirm `pmg-launch-swap.js` exists and handles beta/post-launch state.

Phase 1: UI Copy Updates

1.1 Tour Banner (`app.html` & `pmg-launch-swap.js`)

Goal: Implement beta-aware tour banner copy. Everyone sees the Paid variant during beta. Post-July 1, free users see the Free variant, paid users see the Paid variant.

Free Variant (Post-July 1 Free Users):

HTML

```
<h2 class="tour-card-title">Welcome To PromptMeGood</h2>
<p class="tour-card-sub">Type what you want in the box below and we'll turn it
```

Paid Variant (Everyone during Beta; Paid Users Post-July 1):

HTML

```
<h2 class="tour-card-title">Welcome Back</h2>
<p class="tour-card-sub">Your full toolkit is unlocked – open  Growth Mode fo
```

1.2 Mobile More Menu (:)

Goal: Update one-line descriptions when topbar collapses on mobile.

- **Growth Mode:** "Full marketing suite: Brand Voice, Social Packs, Platform Builder. (Paid feature)"
- **Expert Center:** "Diagnose, Architect, Tune, Variations, and Save. (Paid feature)"

1.3 Tooltips & Toggle Descriptions (app.html)

- **Line ~5068 (Growth Mode toggle):** Remove "in the topbar" from the description.

New: A per-prompt directive that biases output toward sales, marketing, and conversion-focused phrasing. Turn off for neutral/general prompts. (For full marketing prompts with brand voice + social packs, use the  Growth Mode drawer.)

- **Line ~5058 (Advanced Output Settings subtitle):** Remove "Growth Mode (tuning directive)".

New: `<span class="adv-sub">Human Voice, Clarity Boost</span>`

Phase 2: Tuning Upgrades (Frontend & Backend)

2.1 Feature Entry Row

Goal: Add two side-by-side buttons above the " ✨ Build My Prompt" button.

- **Location:** app.html , immediately above .btn-analyze .
- **Layout:** Side-by-side on ALL screen sizes (no stacking on mobile).
- **Labels:** " Growth Mode" and " ✨ Expert Center".
- **Style:** Secondary outlined style, must not compete visually with .btn-analyze . Spacing: 16px+ below row.
- **Paywall Logic:** Buttons are ALWAYS visible to free users (no lock icon). Clicking them triggers the existing paywall card if isPaywallActive() is true (post-July 1). During beta, they open normally.

2.2 Rescue 3 Hidden Toggles

Goal: Surface Growth Mode, Human Voice, and Clarity Boost in the Tune panel.

- **File:** `pmg-quick-modes.js` (inside `mountModesRow`).
- **Constraint:** DO NOT remove the chassis CSS hide rule on `#advanced-options` .
- **Paywall Logic:** FREE for all tiers.
- **Descriptions:**
 - Growth Mode: "Adds a sales and marketing lens to your prompt — practical, results-driven, conversion-focused. Turns on automatically when your goal sounds business-related."
 - Human Voice Mode: "Softens the robotic edge. Your prompt will ask the AI to write like a person, not a machine."
 - Clarity Boost Mode: "Structures the output so it is easier to read and act on. Good for anything where you need a clear, organized response."

2.3 Interview Mode Toggle

Goal: Add Interview Mode toggle to ask clarifying questions before generating.

- **Frontend:** Add to `pmg-quick-modes.js` Quick Modes row.
Description: "Before the AI starts working, it asks you a few questions to make sure it understands what you really need. Fewer surprises, better results."
- **Backend (ai.ts):** Add `interviewMode` (boolean) to `StructuredPayload` and `buildUserMessageFromPayload()` .
- **Paywall Logic (Tier Split):**
 - **Free Tier:** Client-side only. Uses a lightweight local template to generate 3 smart clarifying questions based on category/tone/goal length. Zero API cost.
 - **Paid Tiers:** AI-powered. Fires a call to `/generate` using a new clarifying-questions system prompt branch. This call is **cap-exempt**.

2.4 Target Model Selector

Goal: Add selector for target AI model.

- **Frontend:** Add to tune panel (Universal, Claude, ChatGPT, Gemini, Perplexity).
Description: "Which AI are you sending this prompt to? We'll format it the way that AI works best — Claude gets structured tags, Gemini gets examples up front, ChatGPT gets numbered steps."
- **Backend (ai.ts):** Add `targetModel` (string). Add ONE routing rule to system prompt: only when `targetModel === 'claude'` , wrap context in XML tags.
- **Paywall Logic:** FREE for all tiers.

2.5 Framework Selector

Goal: Add selector for prompt frameworks.

- **Frontend:** Add to tune panel (Auto, RISE, CARE, Step-by-Step).

Description: "Choose how your prompt is organized. RISE builds prompts around a Role, Input, Steps, and Execution. CARE focuses on Context, Action, Result, and Example. Step-by-Step walks the AI through your problem step by step. Auto lets PMG pick the best fit for your goal."

- **Backend (ai.ts):** Add framework (string). Add override rule to system prompt: "If Framework is specified, use that structure instead of auto-selection rules."
- **Paywall Logic:** FREE for all tiers.

2.6 Cleanup

- Ensure pmg-quick-modes.js hides #expert-mode-link .
-

Phase 3: SEO Metadata Updates

3.1 index.html

- **Title:** Free AI Prompt Builder & Optimizer for ChatGPT, Claude & Gemini | PromptMeGood
- **Description:** Free AI prompt builder for ChatGPT, Claude, Gemini, and DALL-E. Build, optimize, and reverse-engineer better prompts in seconds. Includes custom frameworks and target model formatting. No signup.
- **OG/Twitter Title:** PromptMeGood — Free AI Prompt Workstation & Optimizer
- **OG Description:** Finally, AI that understands you. Fix bad prompts instantly and get the answer you were actually looking for. Free core tier. No signup. Local-first. Includes custom frameworks, target model formatting, and Interview Mode.

3.2 app.html

- **Title:** PromptMeGood App | Free AI Prompt Generator & Optimizer
- **Description:** Free AI prompt generator. Turn plain English into better prompts for ChatGPT, Claude, Gemini, and DALL • E. Features custom frameworks, target model formatting, and Interview Mode. Save, refine, and run — no signup.
- **OG/Twitter Title:** Free AI Prompt Generator & Optimizer | PromptMeGood
- **OG/Twitter Description:** Free AI prompt generator that turns plain English into better ChatGPT, Claude, Gemini, and DALL • E prompts. Features custom frameworks, target model formatting, and

Interview Mode. No signup.

- **Structured Data (featureList):** Add "Target Model selector for Claude-specific XML formatting" , "Prompt Frameworks (RISE, CARE, Step-by-Step)" , "Interview Mode for clarifying questions before generation" , "Quick Modes: Growth Mode, Human Voice, and Clarity Boost" .
- **Structured Data (FAQPage):** Update "Is PromptMeGood free to use?" answer to include the new free features (Target Model, Frameworks, Interview Mode, Quick Modes). Update Free offer description to include them.

3.3 pricing.html

- **Title:** Pricing | PromptMeGood - Free & Pro AI Prompt Builder Plans
- **Description:** Start for free with our AI prompt builder, including custom frameworks and target model formatting. Upgrade to Founding Member or Pro for the Expert Command Center and advanced tools.
- **OG/Twitter Description:** Free tier includes custom frameworks and target model formatting. \$79 lifetime or Pro from \$14/mo unlocks the Expert Command Center.

3.4 sitemap.xml

- Update all <lastmod> dates to 2026-05-19 .

Post-Execution Verification

Replit MUST verify:

- ☐ Feature entry row is side-by-side on mobile.
- ☐ Feature entry row buttons trigger the correct panels and show the paywall card for free users post-July-1 (no lock icon).
- ☐ #advanced-options remains hidden by CSS.
- ☐ Growth Mode, Human Voice, and Clarity Boost are visible in the Quick Modes row.
- ☐ Interview Mode toggle exists and triggers the correct tier-split logic (client-side for free, cap-exempt AI for paid).
- ☐ Target Model selector exists and applies XML formatting ONLY for Claude.
- ☐ Framework selector exists and overrides auto-selection in the system prompt.
- ☐ All new controls have the exact approved descriptions.
- ☐ Tour banner swaps correctly based on beta/post-launch state.

☐ No existing functionality is broken.
