

The "Bring 'Em Home" Feature: The Daily Prompt Challenge

To make PromptMeGood a daily habit, we need to look at the psychology behind the most addictive apps in the world (like Wordle and Duolingo). They don't rely on users *needing* to do work; they rely on a low-friction, high-reward daily loop.

The single most powerful feature you can add to PromptMeGood to drive daily active users (DAU) and viral word-of-mouth is **The Daily Prompt Challenge**.

Why This Works (The Psychology)

1. **The Wordle Effect:** A single, shared challenge that changes every 24 hours creates FOMO (Fear Of Missing Out). Everyone is solving the same puzzle on the same day.
2. **The Duolingo Streak:** Tracking consecutive days played taps into loss aversion. Users will log in just to keep their streak alive, even if they don't have real work to do that day.
3. **Low Friction:** It gives users a reason to open the app *before* they have a specific task in mind.

How It Works

Every day at midnight, a new "Challenge" appears at the top of the PromptMeGood dashboard.

- **Example Challenge:** "Generate a photorealistic image of a cyberpunk coffee shop using only 15 words."
- **Example Challenge:** "Write a prompt that forces ChatGPT to explain quantum physics to a 5-year-old in the style of a pirate."

Users use the PromptMeGood tools to build their prompt, run it, and then they can click a "Share My Result" button.

Replit Implementation Brief: The Daily Prompt Challenge

Replit, we are building a viral, habit-forming feature called the "Daily Prompt Challenge." This needs to sit prominently at the top of the main app interface.

1. The Daily Challenge Banner (HTML)

Place this at the very top of the main app container, above the suite tabs.

HTML

```
<div class="pmgv3-daily-challenge-banner">
  <div class="dc-header">
    <span class="dc-badge">🔥 Daily Challenge</span>
    <span class="dc-streak">Your Streak: <strong>4 Days</strong> ⚡</span>
  </div>
  <h3 class="dc-title" id="daily-challenge-title">Loading today's challenge...</h3>
  <p class="dc-desc" id="daily-challenge-desc">Use the tools below to craft the</p>
  <div class="dc-actions">
    <button class="dc-btn-accept" id="btn-accept-challenge">Accept Challenge</button>
    <button class="dc-btn-share" id="btn-share-challenge" style="display:none;">Share Challenge</button>
  </div>
</div>
```

2. The Challenge Logic (JavaScript)

Add this to a new file `pmg-daily-challenge.js` or append to `pmg-chassis-v3.js`.

JavaScript

```
const dailyChallenges = [
  {
    id: 1,
    title: "The Pirate Physicist",
    desc: "Write a prompt that forces ChatGPT to explain quantum physics to a 5 year old",
    suite: "text"
  },
  {
    id: 2,
    title: "Cyberpunk Coffee",
    desc: "Generate a photorealistic image prompt of a cyberpunk coffee shop using the words 'neon', 'rain', and 'coffee'",
    suite: "photo"
  },
  {
    id: 3,
    title: "The Impossible Camera",
    desc: "Write a video prompt featuring a 'Slow Push In' on a melting clock, using the words 'time', 'melting', and 'camera'",
    suite: "video"
  }
];
```

```
// Simple logic to pick a challenge based on the day of the year
function getDailyChallenge() {
  const now = new Date();
  const start = new Date(now.getFullYear(), 0, 0);
  const diff = now - start;
  const oneDay = 1000 * 60 * 60 * 24;
  const dayOfYear = Math.floor(diff / oneDay);

  return dailyChallenges[dayOfYear % dailyChallenges.length];
}

function initDailyChallenge() {
  const challenge = getDailyChallenge();
  document.getElementById('daily-challenge-title').innerText = challenge.title;
  document.getElementById('daily-challenge-desc').innerText = challenge.desc;

  document.getElementById('btn-accept-challenge').addEventListener('click', () :
    // Switch to the correct tab automatically
    if(challenge.suite === 'text') document.querySelector('[data-target="text"]
    if(challenge.suite === 'photo') document.querySelector('[data-target="photo
    if(challenge.suite === 'video') document.querySelector('[data-target="video

    // Pre-fill the goal box to get them started
    const goalBox = document.querySelector('.pmgv3-goal-input');
    if(goalBox) {
      goalBox.value = `Challenge: ${challenge.title}`;
      goalBox.focus();
    }

    document.getElementById('btn-accept-challenge').style.display = 'none';
    document.getElementById('btn-share-challenge').style.display = 'inline-bloc
  });
}

document.addEventListener('DOMContentLoaded', initDailyChallenge);
```

3. CSS Styling

Add to `pmg-chassis-v3.css` :

CSS

```
.pmgv3-daily-challenge-banner {
  background: linear-gradient(135deg, rgba(0, 200, 150, 0.1) 0%, rgba(0, 100, 2
  border: 1px solid rgba(0, 200, 150, 0.3);
  border-radius: 12px;
  padding: 20px;
```

```
margin-bottom: 24px;
box-shadow: 0 4px 15px rgba(0,0,0,0.2);
}
```

```
.dc-header {
  display: flex;
  justify-content: space-between;
  align-items: center;
  margin-bottom: 12px;
}
```

```
.dc-badge {
  background: #00c896;
  color: #000;
  padding: 4px 10px;
  border-radius: 20px;
  font-size: 12px;
  font-weight: bold;
  text-transform: uppercase;
  letter-spacing: 0.5px;
}
```

```
.dc-streak {
  color: #fff;
  font-size: 14px;
}
```

```
.dc-streak strong {
  color: #ffb800;
}
```

```
.dc-title {
  color: #fff;
  font-size: 20px;
  margin: 0 0 8px 0;
}
```

```
.dc-desc {
  color: rgba(255, 255, 255, 0.8);
  font-size: 14px;
  margin: 0 0 16px 0;
  line-height: 1.5;
}
```

```
.dc-actions button {
  padding: 10px 20px;
  border-radius: 8px;
  font-weight: 600;
}
```

```
    cursor: pointer;
    border: none;
    transition: all 0.2s;
}

.dc-btn-accept {
    background: #fff;
    color: #000;
}

.dc-btn-accept:hover {
    background: #e0e0e0;
}

.dc-btn-share {
    background: transparent;
    border: 1px solid #00c896 !important;
    color: #00c896;
}

.dc-btn-share:hover {
    background: rgba(0, 200, 150, 0.1);
}
```
