

# Replit Fix Brief: Child Photo Warning Notice

Replit, we need to add a clear, friendly warning notice inside the Photography suite to inform users about AI restrictions on editing photos of children.

Please implement this notice exactly as described below.

## 1. The Warning Notice Copy

The notice should be concise, friendly, and clearly explain the limitation without sounding alarming.

**Title:** ⚠️ Note on Editing Photos of Children

**Body:** Major AI platforms (like Gemini, ChatGPT, and Claude) have strict safety filters that often block editing or altering photos of children and minors. This is to prevent misuse and protect privacy. If you are trying to edit a family photo and the AI refuses, this is likely why. For editing photos of kids, we recommend using traditional tools like Photoshop or Lightroom instead.

## 2. Placement and Styling

This notice should be placed inside the **Photography** tab, ideally near the image upload/reference area or right above the "Generate Image Here" button, so users see it before they try to process a photo.

### HTML Structure:

HTML

```
<div class="pmgv3-child-photo-warning">
  <div class="warning-icon">⚠️</div>
  <div class="warning-content">
    <strong>Note on Editing Photos of Children</strong>
    <p>Major AI platforms have strict safety filters that often block editing p
  </div>
</div>
```

### CSS Styling:

Add this to `pmg-visual-studio.css` (or the relevant stylesheet for the photo suite):

CSS

```

.pmgv3-child-photo-warning {
  display: flex;
  gap: 12px;
  background: rgba(255, 170, 0, 0.1); /* Subtle warning yellow/orange */
  border: 1px solid rgba(255, 170, 0, 0.3);
  border-radius: 8px;
  padding: 12px 16px;
  margin-bottom: 16px;
  align-items: flex-start;
}

.pmgv3-child-photo-warning .warning-icon {
  font-size: 18px;
  line-height: 1.2;
}

.pmgv3-child-photo-warning .warning-content strong {
  display: block;
  color: #ffb84d; /* Readable warning color on dark background */
  font-size: 14px;
  margin-bottom: 4px;
}

.pmgv3-child-photo-warning .warning-content p {
  margin: 0;
  font-size: 13px;
  color: rgba(255, 255, 255, 0.8);
  line-height: 1.4;
}

```

Please insert this HTML into the Photography suite layout ( `pmg-visual-studio.js` or the main HTML file where the photo suite is defined) and add the CSS to the corresponding stylesheet.
